-- As Reported by Exporters

Outstanding export sales as reported by private exporters and compiled with other data in this release give a snapshot view of the current contracting scene. At any given time in the course of a marketing year outstanding sales do not bear a consistent relationship to eventual export shipments. A meaningful export projection is not obtainable by the simple device of adding outstanding sales to exports to date. The latter data, alone, may provide a more reliable measure of current export activity than may be derived from a year-to-year comparison of outstanding sales.

EXPORT SALES REPORT

Comments on release of August 26, 1976 (based on reports from exporters for the week ending August 15, unless otherwise noted):

Wheat: New sales continued brisk with an increase of 742,000 MT over last week's total. Significant sales were reported to Morocco, Japan, Taiwan, Korea, and India, as well as 150,000 MT to East Germany originally reported last week under daily sales. Sales to the U.S.S.R. rose slightly as 10,400 MT of optional origin sales were switched to U.S. origin and 20,300 MT for East Germany were changed to the U.S.S.R. Although sales and export shipments continue to be less than a year earlier, they are currently about 45% of the export projection for the marketing year.

Corn: Sales activity for both old and new crop corn was slow last week with only nominal increases in sales to many different countries. Total sales to the U.S.S.R. rose 17,300 MT as a result of a change from unknown destination to U.S.S.R. Weekly export clearances continue heavy and with just 7 weeks remaining in the 1975/76 crop year, shipments seem likely to equal or exceed the export projection of a record 43.2 million MT.

Rice: The 1976/77 rice marketing year continues to be characterized by a sluggish export demand. Activity last week was highlighted by the cleanup of export business carried over from the old crop year. Commercial export demand continues slow, with Canada and some EC customers making small purchases last week. The market is eagerly awaiting news of expected PL-480 rice sales. The USDA recently announced that rice shipments under Title I of PL-480 are expected to total slightly over 200,000 MT for the Aug.-Sept. period, with another 300,000 MT during Oct.-Dec.

Cotton: The volume of sales slackened this week although it was at an annual rate of 5 3/4 million bales. A number of European countries bought small quantities which made total sales to that area 293,000 running bales, a fifth larger than exports to Europe during all of 1975/76. Korea remained the major buyer this week contracting for 69,000 R.B.

Soybeans: The EC, Japan and Romania were last week's principal importers of U.S. soybeans. Sales of U.S. soybeans continued heavy as major competition from Brazil was removed when crushers there bought domestic soybeans at prices which effectively kept them off world markets. Total exports slightly exceed the USDA projection with about 2 weeks remaining in the 1975/76 MY. However, it should be pointed out that accumulated exports reported to OGSM are running ahead of census and AMS export data.

Soybean Oil Cake and Meal: Weekly exports of 156,600 MT jumped nearly 50% over the previous week's level, primarily due to shipments to Europe (East and West) and Japan. Total sales are currently running ahead of the USDA projection.

Soybean Oil, Cottonseed Oil, Oats, Barley, Rye and Grain Sorghums: Showed no significant activity.
